

Using the FRC Script Library

What is the FRC Script Library?

A set of programs and scripts that provide automation and additional utility for the Fource Sign team. It is a mix of two Javascript dialects, vanilla Javascript and Extendscript.

Using the Book Automator

1. Navigate to the following path in the /company directory of the server:

```
'/Volumes/company/Signs/Multi Use 2.0/0-Approved/~Sign Library/99-Data/00-scripts'
```

2. Jump to your local scripts folder by right-clicking the **User** folder in your scripts panel and hitting “Reveal in Finder”

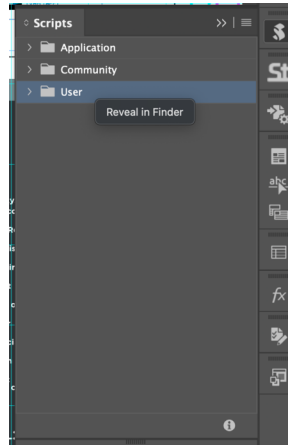

Figure 1: Example of shortcut tip

```
'/Users/YOUR_USER_NAME_HERE/Library/Preferences/Adobe InDesign/Version 20.0/en_US/Scripts/Scripts Panel'
```

3. Open this template on the server:
Note - the scripts will not work on anything other than a designated template.

```
'/Volumes/company/Signs/Multi Use 2.0/0-Approved/~Sign Library/99-Data/00-automated_templates/Sign_Book_Template-09S.indt'
```

4. Click File -> Import XML. Load the XML file that corresponds with your contract from here:

```
'/Volumes/company/Signs/Multi Use 2.0/0-Approved/~Sign Library/99-Data/xml_lib'
```

4. Run the **FRC-make__pages.jsx** script from your Scripts Panel:

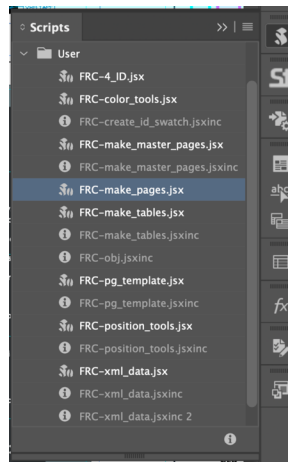

Figure 2: Example of scripts panel

5. Answer any of the dialogues of the script as they appear, it should leave you with a book that has basic page layouts and tables that correspond with the contract you chose.
